Petrochemical Company Profile 2024

New plan steel detailing is established in 2006. With over 18 years of experiences to provide structural engineering and steel detailing with to private sector clients in both domestically and internationally. We are committed to apply new technologies and delivering on time, accurately and within. Our strength lies in the competency of our personal.

Our history begins in 2006, with the foundation of a team of experts specializing in steel structural engineer and steel detailing with more than 1 years of experience. We have designer teams who are experienced in the steel business both domestically and abroad. We are confident that our services will satisfy our customers by exceptional meeting both standards and quality. Moreover, our teams have the experience of designing large steel structures for many notable projects for domestic and international customers utilizing TELKA STRUCTURE technology software from abroad. Additionally, our company has been awarded the certificate ISO 9001:2015 Quality Standard for Shop Drawing. We continuously improve on the ISO 9001:2015 quality standards. Customers can be assured of the quality of our services which cover through all the work processes from consulting, designing, producing, and installing to post-sales service. Our company pledges to maintain the continued improvement of our services.

We have worked with several international companies, we are accustomed to being awarded small-medium scale project, have successfully completed theses jobs despite their complexity.

Our projects very in scale and complexity and are executed by an experienced drafts team.

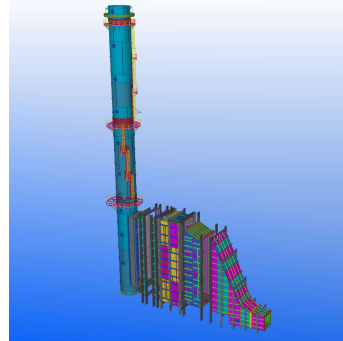

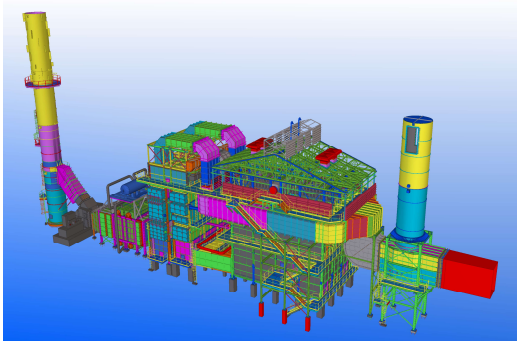

New Plan Steel Detailing Co. Ltd. is committed Quality, Health, Safety and Environment via ISO 9001: 2015 structured systems.

A Steel detailing services.
